

Renewable Energy Give it 100% REenergise

HOW TO MAKE THE CASE FOR 100% RENEWABLES AT YOUR WORK!

Did you know some of the world's biggest companies are committing to 100% renewable electricity not only because it's the right thing to do, but because it's the smart business thing to do?

Some of Australia's biggest companies like Telstra, Carlton and United Breweries and Aldi have also committed to make the switch to power their entire businesses with 100% renewable electricity.

If even more of Australia's biggest companies switch to 100% renewable energy, it will create thousands and thousands of future-proof jobs for Australians, modernise our energy grid, and help ensure a safe and healthy future for all.

KEY TALKING POINTS:

- Business and industry uses about 70% of Australia's electricity every year.
- Electricity is the largest source of emissions in Australia.
- Coal is Australia's #1 driver of climate change. Every workplace can take a significant step to beating global warming by making the switch to 100% renewable electricity.
- Over 230 of the biggest global companies have committed to the RE100 initiative, including Google, Nestle and Walmart.
- Nearly 100 companies with operations in Australia have committed to 100% renewable electricity, including Carlton and United Breweries, Mars Australia, IKEA, and Telstra.

**SWITCHING TO RENEWABLE
ELECTRICITY FOR BUSINESS
JUST MAKES SENSE.**

**IT'S CHEAPER AND CLEANER.
IT'S BETTER FOR THE PLANET.
IT'S BETTER FOR BUSINESS.**
